PROFILE

Full-stack developer building scalable web applications. Strong foundation in API development, database design, and responsive UI implementation. Computer Science student with production-ready project experience.

PROJECT

Learning Management System 2026 - PRESENT
Full-Stack · PERN Stack [Live](#) [Github](#)

- Built an entire SaaS-style learning platform alone authentication, payments, content delivery, progress tracking, and admin tools
- Stripe is live and handling real money: users subscribe, get instant course access, and lose it automatically if payment fails zero manual intervention
- Applied production best practices including validation, rate limiting, and error handling

EXPERIENCE

Learning Management System 2026-PRESENT
Personal Projects

- Designed, built, and deployed a full production application independently owning database schema, API design, frontend
- Maintained a live application on Render with environment based configuration and deployment pipelines

EDUCATION

Bachelor of Computer Science (In Progress)
Western University · Phnom Penh, Cambodia 2024-PRESENT
